

MOBIUS IMAGING

Mobius Imaging seamlessly integrates advanced imaging technologies into medical workflow – enhancing the clinician’s ability to collect the highest quality images whenever and wherever they are needed.

AT A GLANCE

- Founded in 2008
- Funded through a combination of angel investors, non-dilutive funding and direct investment from a strategic partner
- Focus is on research and development, design, and manufacturing of advanced medical imaging systems
- Holds ISO 13485 certification for its quality management system
- Has received 510(k) clearance for its first commercial product, the Airo mobile intra-operative CT system, distributed under an exclusive sales and service agreement with BrainLab

MOBIUS MISSION

Mobius is unwavering in its pursuit of the best. The best assessment of clinical need. The best technologies to overcome limitations. And the best partnerships with industry pioneers and leaders.

Our mission is:

- To make medical imaging readily available whenever and wherever it is needed
- To create advanced imaging solutions that enhance usability and simplify workflow
- To create value for our customers, investors, and stakeholders

TECHNOLOGIES

Making conventional CT technology mobile and flexible enough for a broad range of applications requires a total re-engineering. From a curved battery array and high voltage generator to a proprietary surgical column, every component of our mobile helical CT system has been rethought and customized.

The result is Intelligent Imaging, an approach to creating novel technologies that meet clinical need and fit into workflow – ultimately to enable better clinical decision making. Intelligent Imaging comprises an array of technological innovations that is making medical imaging possible whenever and wherever it is needed – from the OR to the ER and other clinical settings.

PIPELINE

Mobius Imaging’s core technologies have a broad range of possible applications. Imagine:

- CT scanning in prone, supine and weight-bearing postures for general or musculoskeletal radiology applications
- Mobile integrated fluoroscopic and diagnostic imaging for interventional radiology applications
- Mobile bi-plane fluoroscopy for cardiovascular applications

Mobius Imaging’s first commercial product, the Airo mobile intra-operative CT system, is distributed under an exclusive sales and service agreement with BrainLab.
